

A-Young Park, Ph.D.

PUBLIC
ACADEMIC CV

Senior Researcher | Finance, Network Science, and Artificial Intelligence

Supervisory Strategy Research Team, Financial Supervisory Service | Seoul, Republic of Korea
ayoungp@fss.or.kr | github.com/Ayppark

Finance researcher working at the intersection of financial economics, network science, and data-driven modeling. Research interests include systemic risk, financial intermediation, empirical asset pricing, complex systems, graph machine learning, natural-language processing, digital finance, and supervisory innovation.

APPOINTMENTS

Jan 2026-present	Senior Researcher <i>Supervisory Strategy Research Team, Financial Supervisory Service</i> Research on financial stability, digital finance, blockchain-based networks, regulatory frameworks, and supervisory innovation.
Mar 2024-Jan 2026	Senior Manager <i>Future Finance Research Team, Financial Supervisory Service</i> Research on financial-market analysis, financial stability, regulation, and innovation.
Jul 2021-Feb 2024	Research Assistant Professor <i>Institute of Knowledge Management, Chosun University</i> Research on financial-market connectedness and deep learning under a National Research Foundation of Korea grant.
Jan-Feb 2023	Visiting Scholar <i>Department of Anesthesiology, University of Michigan Medical School</i> Research on collapse and recovery dynamics in global financial markets using complex-network theory.
Mar 2019-Feb 2020	Visiting Scholar <i>Department of Anesthesiology, University of Michigan Medical School</i> Interdisciplinary research on critical transitions in neural and financial networks.
Jan-Feb 2019	Visiting Scholar <i>Department of Physics, POSTECH</i> Research on nonlinear dynamics and complexity in brain and financial-market systems.
Jan-Feb 2017	Visiting Scholar <i>University of Wisconsin-Milwaukee</i> Research on board diversity and behavioral finance.

EDUCATION

Feb 2021	Ph.D. in Finance <i>Chosun University</i> Dissertation: Essays on Financial Connectedness, Systemic Risk, and Performance. Excellent Research Award.
Aug 2016	M.S. in Finance <i>Chosun University</i> Thesis: An Empirical Study on Measuring Systemic Risk Using Variance Decomposition and DebtRank.

RESEARCH FUNDING

Financial Market Analysis via Connectedness and Deep Learning - National Research Foundation of Korea (NRF), KRW 200 million, July 2021-March 2024. The project examined connectedness among financial institutions and corporate boards, risk propagation, knowledge spillovers, and predictive applications.

SELECTED WORKING PAPERS

Global Banking Networks and Loan Pricing (with Gabjin Oh). Job market paper. Best Paper Award semifinalist in Financial Intermediation & Markets, Financial Management Association 2023. [SSRN](#) [DOI](#).

Investor Sentiment and Stock Return Predictability: The Influence of Online Stock Discussion Boards (with Danbi Park and Gabjin Oh).

A Network Approach to Optimal Portfolio.

Board Diversity and CEO Power.

TEACHING EXPERIENCE

2021-2023

Introduction to FinTech

Chosun University

Undergraduate course; contributed to course design and delivery.

2023

Security Investment Practice

Chosun University

2021, 2023

Management Statistics

Chosun University

SELECTED HONORS AND AWARDS

Best Paper Award Semifinalist, Financial Intermediation & Markets, Financial Management Association, 2023.

Ph.D. Excellent Research Award, Chosun University, 2021.

Best Research Award, Korea Academy of Complexity Studies, 2018.

Best Research Award, Korea Academy of Complexity Studies, 2017.

Encouragement Award, Social Sciences Korea Networking Conference, 2017.

Brain Korea 21+ Fellowship, Korean Government, 2015-2020.

Summa Cum Laude, Department of Mathematics, Chosun University, 2014.

SELECTED INVITED LECTURES

Nov 2025

From Research to Regulatory Affairs

Inha University

Jul 2023

Global Banking Network and Syndicated Loan Prices

Asia-Pacific Applied Economics Association Workshop, Xian Jiaotong University

2022

Network Analysis in the Financial System

Korea Academy of Complexity Studies; Ajou University; Pukyong National University

SELECTED CONFERENCE CONTRIBUTIONS

Global Banking Network and Syndicated Loan Prices - Sydney Banking and Finance Conference 2025; Financial Management Association 2023; Computing in Economics and Finance 2023; Korean Finance Association; Asia-Pacific Physics Conference; Networks/Sunbelt-NetSci.

A Network Approach to Optimal Portfolio: Application to the Korean Stock Market - Computing in Economics and Finance 2023.

Measuring Similarity between Trend Behaviors of Multivariate Time Series - European Financial Management Association 2023; Computing in Economics and Finance 2022.

The Effect of Knowledge Diversity of Board Networks on Corporate Value - Computing in Economics and Finance; Econophysics Colloquium; Asia-Pacific Econophysics Conference.

Financial Stability Based on Information Flows among Investor Trading Behavior - Computing in Economics and Finance; NetworkX; SigmaPhi; JAFEE.

PROFESSIONAL SERVICE

Journal referee: PLOS ONE; Journal of the Korea Society Industrial Information System; Humanities and Social Sciences Communications.

Conference roles: Discussant at Korean Finance Association, EFMA, FMA, and Asia FMA; reviewer for FMA; session chair at CEF, FMA, and Asia FMA.

Professional memberships: Financial Management Association; Korean Securities Association; Korea-America Finance Association.

PROFESSIONAL TRAINING

Anti-Money Laundering Specialist Program, Hanyang University, December 2025 - AML regulation, crypto-assets, and financial surveillance.

TECHNICAL SKILLS AND LANGUAGES

Programming and research	Python, Stata, MATLAB, C++, LaTeX, Gephi
Languages	Korean (native), English (fluent)
